Signature of Principal Date Signature Public Health Nurse/School Nurse

Policies and Procedures for the Administration
Of Medication to Students in the Southmoreland School District

1. Policy Concerning Prescription Drugs

The basic position of the Southmoreland School District regarding administering medication during the school day is that it should be avoided if at all possible. If in order to maintain sufficient health to participate in the school program a procedure shall be adhered to:

- A. Requests from a parent or guardian for permission for their child to receive medication during school hours must be accompanied by written authorization signed by the parent or guardian. A physician's signature is required on the Physician's Authorization of Medication for a Student at School form, which details the name of the drug, dosage, and time interval for the medication that the student is to receive. Under no circumstances, are any drugs to be administered that have not been prescribed by a physician and with respect to which parental permission has not been obtained. Contraindications for administering of medicine must be clearly stated by the physician.
- B. The medication, which has been prescribed by the physician, must be brought to school in a container appropriately labeled by the pharmacy or by the physician.
- C. The persons(s) who have been designated for the administration of the medication to the student shall maintain records of the administration of the medication to the student as follows:
 - 1. The date and time when the medication is first administered to the student (and each subsequent administration) under the authorized agreement and the name of the drug, dosage and route.
 - 2. The date when the medication is discontinued.
 - 3. Medication, which is administered only "as needed", is to be recorded each time it is given. Record date, time and route of administration.
- D. Medications will only be administered by a Certified School Nurse or a Registered Nurse who is working with or for the Ceritifed School Nurse
- E. This form should be completed on all medications, prescriptions and non-prescriptions to be administered during the school day.

2. Policy Concerning Non-prescription Drugs

If it becomes necessary for a student to use non-prescription medication, such as aspirin, the student or parent(s) or guardian(s) will be responsible to provide the medication and physician authorization. The same policy applies to non-prescription drugs as prescription drugs.
